NEW HP0-S42 Exam Questions & Answers:https://drive.google.com/folderview?id=0B75b5xYLjSSNWm5zRU9iYm8zZms&usp=sharing QUESTION 165Which HP Gen9 server family support the H240ar Smart HBA? A. blade serverB. MoonshotC. ApolloD. Rack and tower server Answer: D QUESTION 166You are planning a deployment of HP OneView. The customer provides you with a list of networks they need to use inside a BladeSystem enclosure. Which detail is required for a network in HP OneView when that network is to be configured as a member of a network set? A. VLAN IDB. Network maskC. GatewayD. 802.1p Answer: A QUESTION 167 A customer is considering a BladeSystem c7000 enclosure. The customer needs to visually monitor and easily troubleshoot the system. Which product should you demonstrate for the customer ? A. Virtual Connect FlexFabricB. UEFIC. Insight Remote SupportD. Insight Display Answer: C QUESTION 168Which software tool can be used to download the Active Health System log on an HP ProLiant Gen9 server? A. Smart Storage AdministratorB. Array Diagnostic UtilityC. HP OneViewD. Intelligent Provisioning Answer: D QUESTION 169A customer subcontracts for the automotive industry and needs a compute infrastructure that supports advanced design applications and can scale as the business grows. The customer has space constraints in their data center and will use their existing racks. Which HP server series should you recommend to the customer? A. ProLiant MLB. ProLiant BLC. ProLiant SLD. ProLiant DL Answer: C QUESTION 170An architect is designing a new data center that will host multi-vendor equipment. Which questions are relevant to the design of the data center? (select two) A. Who is the raised flooring manufacturer?B. Will new or existing fire suppression and alarm systems be implemented?C. Will the site have more than one electrical power feed?D. Will the data center emergency lighting be direct or indirect? E. Will there be a designated area for the data center operators to meet in an emergency? Answer: C QUESTION 171A customer has a VMware virtualization environment and HP ProLiant Gen9 servers. The customer needs an easy way to quickly add a new VMware vSphere hypervisor to the environment. Which components should be part of your proposed solution?(select three) A. Smart Update ManagerB. Insight Control server deploymentC. Insight Control server provisioningD. HP OneView for vCenterE. Virtual Connect Enterprise ManagerF. HP OneView Answer: AEF QUESTION 172Regards to purchase a number of Gen9 servers for projects that will be deployed for performanceHigh level of fault tolerance is required. The customer plans to use the Smart Array B140i Controller as the servers. Why should you recommend against this? (select two) A. a PCIe slotB. No cache memory availableC. No SATA Drive supportD. No RAID 6 supportE. Support is limited to one internal and eight mini-SAS double-wide connectors Answer: BD QUESTION 173You need to explain to a customer how power is monitored and managed in an Apollo 6000 solution. Which HP component should you describe to the customer? A. Advanced Power ManagerB. HP OneviewC. Cluster Management UtilityD. External Power Shelf Answer: D QUESTION 174Which HP server product allows you to implement HP Agentless Management with SNMP alerts regardless of the state of the host server? A. UEFIB. OneviewC. Intelligent ProvisioningD. ILO Answer: DExplanation:http://h20564.www2.hpe.com/hpsc/doc/public/display?docLocale=en_US&docId=emr_na-c03283675 QUESTION 175A customer needs to increase the performance of their Microsoft Hyper-V cluster, especially the performance around Live Migration. The customer has C7000 enclosure with BL460c Gen8 blades. Interconnect slots 1 and 2 have HP Virtual Connect Flex-10/10D Module installed. The BL460c Gen8 blades use HP FlexFabric 10Gb 2-port 534FLB FlexibleLOM.Which implementation should you recommend to meet the customer's needs ? A. Add two Virtual Connect FlexFabric interconnect modules that support SMB Direct over RoCE into bays 3 and 4 and reconfigure the FlexLOMB. Upgrade the Virtual Connect FlexFabric interconnect modules to models SMB Direct over RoCE and configure Hyper-VC. Enable RoCE on the FlexLOM and configure SMB Direct to allow Hyper-V Migration on the adapterD. Upgrade the FlexLOM and FlexFabric interconnect modules to models that support SMB Direct over RoCE and configure Hyper-V Answer: D QUESTION 176A customer needs to implement NVDIMM technology in their HP ProLiant servers.When designing the solution, which aspect of NVDIMMs should you consider? A. The presence of persistent memory in NVDIMMs doubles the amount of total memory size that is availableB. The higher performance of NVDIMMs over RDIMMs is accompanied by greater heat generationC. The presence of persistent memory in NVDIMMs limits the amount of total memory size that is availableD. NVDIMMs use a controller to drive data signals, which makes them more vulnerable to non-recoverable memory conditions. Answer: A QUESTION 177A customer has a rap growing large rack-mount server environment. The customer needs to display a standardized process that will streamline server provisioning.

Including hardware configuration and operating system deployment. Which HP technology should you recommend to the customer ? A.   HP Smart Storage AdministratorB.   HP Intelligent ProvisioningC.   HP Rapid Deployment PackD.   HP Insight Control server provision Answer: C QUESTION 178What does ILO Federation use as its primary source for discovery when locating multiple system ILOs ? A.   DHCPB.   SNMPC.   MulticastD.   TCP/IP Ping Sweeps Answer: C QUESTION 179A customer is interested in decreasing their time to service by using HP server solutions but is concerned about the high cost of IT staff that might be needed to administer and manage the solutions. Which key HP design principle should you explain to the customer? A. converged infrastructureB.   software defined managementsC.   server virtualizationD.   workload optimization Answer: A !!!RECOMMEND!!! 1.Braindump2go|2016 Sep.
